

Solar Farms SOS at Stowe-by-Chartley

Statement

As yet, the Parish Council has not released an official statement or information-package relating to the situation, which exists within the parish of Stowe-by - Chartley in Staffordshire, and particularly the very small hamlet of Drointon.

An application for a 155-acre solar farm has already been granted planning permission in Drointon. If the second and much larger 210-acre proposed solar farm development, (which is immediately adjacent to the first application) is granted, this will represent **over 80% of the very small hamlet of Drointon**, which will then, be completely covered in solar panels.

This will result in **Cumulative Impact**, that would be highly detrimental to the amenities of Drointon and the adjacent communities for the next 40 years plus.

If any members of the public wish to make contact, please feel free to use the email address below:
